

FREE Workshop Opportunity for High School Ecology/Biology
Teachers!

IMPROVING ECO-LITERACY

**a two-day workshop designed for the high school Biology and/or Ecology
teacher**

Engage in lively college-level discussions and presentations on fundamental
ecology and natural resource principles

Conduct scientific investigations exploring impact of human disturbance on
aquatic and terrestrial ecosystem health and function

Increase student awareness of environmental impact issues

Activate the eco-side of your brain!

Perks include:

- A \$100 stipend for attending the entire workshop
- Lunch and snacks both days
- Experience the U of MN's world-class biological research station
- Certification of 16 hours of instruction
- Optional graduate credit from the University of Minnesota
- Busing subsidy to bring your class on a field trip to Cedar Creek to practice the methods learned in the workshop
- Option to stay onsite for \$20/night
