

A Calendar in the Classroom Workshop

Saturday, August 22, 2009

9:00am to noon

Cedar Creek Ecosystem Science Reserve

2660 Fawn Lake Drive, East Bethel, MN 55005

Kids are fascinated by the weather, the moon, stars and planets. They are intrigued by insects, birds and other animals. They are drawn to flowers.

Capture your students' inquisitive nature with a Minnesota-based science curriculum that is **easy to implement** and **fun to explore!**

Integrate math, science and language arts into your daily routine with engaging lessons developed and tested by Minnesota teachers. The standards-based lessons for grades K-5 are derived from the scientific information contained in the beautiful Minnesota Weatherguide Environment Calendars.

We will explore some of the hands-on lessons about weather and seasonal events involving plants and animals, phases of the moon and other exciting topics.

Fun and Free Materials

- Minnesota Weatherguide Environment Calendar
- Minnesota standards-based Curriculum
- CEUs

Details:

- To register, contact Mary Spivey: spive007@umn.edu
- We will take an optional tour of Cedar Creek Ecosystem Science Reserve after the workshop. Bring a bag lunch if you plan to take the tour.
- Cost: FREE!
